CAREER OBJECTIVE

Enthusiastic software developer with practical experience in Java, Python, Web Development, and Machine Learning. Built and deployed projects involving machine learning models and dynamic web applications. Certified in Java, Python programming and web technologies. Eager to contribute technical expertise to collaborative and innovative software solutions.

EDUCATION

Degree/Exam	Year	College/Institute	Score
B. Tech - CSE(AI)	2020 - Present	Madanapalle Institute Of Technology & Science	CGPA : 8.7(6 th Sem)
Intermediate - M.P.C	2020 - 2022	A.P. Model School & Jr. College	Percentage : 73.7
SSC	2019 - 2020	A.P. Model School & Jr. College	Percentage : 91.3

SKILLS

- Programming Languages : Java, Python
- Machine Learning
- Web Technologies : HTML, CSS, JavaScript
- DataBases : SQL
- Cloud : AWS Cloud
- Soft Skills : Teamwork, Communication

PROJECTS

BGMI Victory Predictions Using ML Classification Algorithms

- Developed a classification model to predict BGMI match outcomes using player statistics, in-game factors, and past performance.
- Collected and preprocessed large datasets to handle missing values, normalize features, and improve model accuracy.
- Compared results across multiple classification algorithms (Logistic Regression, Random Forest, etc) to identify the most suitable approach.
- Tech Stack : Python, Google Colab, Pandas, NumPy, Scikit-Learn.

Portfolio Website 🌐

- Created a responsive personal portfolio website to showcase projects, skills, and achievements.
- Created a multi-page responsive portfolio using HTML, CSS, and JavaScript.
- Added sections like Home, About Me, Projects, Skills, Certificates, and Contact for easy navigation.
- Included downloadable resume and certificates for quick access to credentials.
- Displayed projects with images and short descriptions to clearly show technical skills
- Tech Stack : HTML, CSS, JavaScript, Netlify.

INTERNSHIPS

Domain : Machine Learning

06/2024 - 8/2024

Organization : Pragyashal

Remote

Description : This project predicts BGMI match outcomes by applying machine learning on player stats, in-game parameters, and past performance trends. Built in Python with Scikit-Learn, it includes advanced data preprocessing, feature engineering, and comparison of multiple classification algorithms to achieve high accuracy. The complete open-source code is available on GitHub for further use and enhancement.

CERTIFICATIONS

- Java Programming - HKUST.
- Python Programming - Meta.
- HTML, CSS, JavaScript - Infosys Springboard.
- SQL and Relational Databases 101 - IBM SkillsBuild.
- AWS Cloud Practitioner Essentials - NASSCOM.
- Deloitte Technology Job Simulation - Forage.
